Jane Henney, Commissioner  
Food and Drug Administration  
Docket # 00P-1211/CPI  
5630 Fishers Ln., Rm. 1061 (HFA-305)  
Rockville, MD. 20852

Dear Ms. Henney:

We are concerned about the development of genetically-engineered foods. There seem to be so many risks that a great deal of caution has to be used in their regard. These risks include loss of biodiversity, genetic "drift", increased allergies, greater reliance on chemicals and control of the world's seeds through patents owned by a few corporations.

It is our hope that the FDA require that no new GE foods be released until the FDA insists on long-term safety testing of all GE foods before they go to market. We also hope that the FDA will insist that all GE foods currently on the market be labeled so that we can know what we're eating.

Thank you.

Sincerely,

*Marie Fehribach*

*Bob Fehribach*
